

Professional Summary

Software Developer with hands-on experience in full-stack web development and AI applications. Skilled in Python, C#, ASP.NET Core, and Machine Learning. Experienced in building AI-powered applications using NLP, vector embeddings, and Generative AI.

Education

Zeal College of Engineering and Research, Savitribai Phule Pune University (SPPU), Pune, India B.E. in Information Technology CGPA: 6.9/10 Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Machine Learning	2022 - 2026
Modern College of Art, Science and Commerce, Pune, India <i>Class XII (HSC), Science, Percentage: 59.17%</i>	2020 - 2022
Ramrajya School, Pune, India <i>Class X (SSC), Percentage: 87%</i>	2019 - 2020

Skills

- Languages:** Python, C#, Java
- Frameworks:** ASP.NET Core
- Web & Libraries:** HTML5, CSS, RESTful APIs, TensorFlow, scikit-learn
- Databases:** MySQL
- AI/ML:** Machine Learning, Deep Learning, NLP, Vector Embeddings, Generative AI
- Tools:** Git, GitHub, Power BI, VS Code, Jupyter Notebook, Docker

Work Experience

EY Global Delivery Services and AICTE Intern	Feb 2025 – Mar 2025
- Contributed to 2 full-stack applications (food delivery, auction) as part of a 3-member team, delivering 5+ frontend screens. - Built and integrated 4+ backend API endpoints connecting frontend features to MySQL data layers, supporting core order and bidding workflows. - Identified and resolved 5+ functional and UI bugs during testing cycles, improving workflow reliability. - Collaborated with the development team using Agile practices to plan, build, and refine features across 2 sprints.	

Projects

Tactical Trends – AI-Based News Aggregation & Recommendation System link	Feb 2026
- Developed a full-stack AI-powered news platform using Python and Django, enabling personalized content delivery. - Implemented semantic search using vector embeddings and NLP techniques to improve news retrieval relevance. - Designed and built a recommendation engine that curates articles based on individual user interests and reading behavior. - Built a recommendation module processing multiple news categories for personalized content delivery. - Structured and managed relational data using MySQL for efficient storage and retrieval.	
AI Resume Optimizer – Full Stack Web Application	Nov 2025
- Built a full-stack web application using C#, ASP.NET Core, and React.js to automate resume analysis. - Designed a responsive, user-friendly frontend interface using React.js and CSS. - Designed and tested 10+ RESTful API endpoints for resume analysis and feedback generation. - Integrated Ollama AI to generate automated, ATS-friendly resume suggestions and improve user outcomes. - Connected frontend and backend components through RESTful APIs, ensuring reliable end-to-end data flow.	

Academic and Extracurricular Achievements

- Solved 200+ Data Structures and Algorithms problems, strengthening problem-solving and algorithmic programming skills.
- Volunteered with the Green Campus initiative and helped plant 50+ saplings as part of a campus sustainability effort.

Additional Information

- Strengths:** Problem-Solving, Leadership, Teamwork, Time Management
- Interests:** Data Structures and Algorithms, Cricket, Chess
